

# Data Backup & Recovery

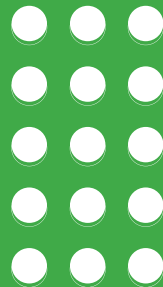

Data is the most important asset in your business and ANY LOSS can be detrimental. We design your Data Backup & Recovery solution to protect against loss.

## Benefits of Data Backup and Recovery

01 Protect Your Data

02 Reduce Downtime

03 Reduce Costs

## 3-2-1 Data Backup Rule

- 3 copies of your data
- 2 different storage media
- 1 copy offsite

A proper Data Backup & Recovery plan should always include multiple copies of your data, with at least one copy stored offsite. One copy of your data could become corrupt causing your recovery to fail. AsystYOU Technology will custom design a backup strategy to protect your business data.
