

# Hardware-as-a-Service

**Hardware-as-a-service (HaaS) allows your business to use the most up-to-date and secure IT equipment without incurring the up front cost of a purchase.**

HaaS allows you to pay as you go by subscribing to a hardware plan from AsystYOU Technology on a recurring basis. We are responsible for maintaining the hardware, keeping software up-to-date, and providing support.

As hardware ages it may no longer be able to run the most recent, and secure, versions of software. This makes that hardware, and your business, more susceptible to attack. HaaS provides your business with the most up-to-date IT equipment, reducing your exposure.

## Benefits of HaaS

01

Reduce Upfront Expense

02

Up-to-date Technology

03

Improved Security
